What is the interest rate?

- AER stands for annual equivalent rate and shows what the interest rate would be if interest was paid and compounded each year.
- Interest is calculated daily and paid into your account either monthly or annually, depending on the option you select at account opening.

Can Redwood Bank change the interest rate?

- No, the interest rate is fixed for the duration of the term.

What would the estimated balance be after 12 months based on a £10,000 deposit?

- Based on the interest rate of 3.95%, an account with £10,000 will have a balance of £10,395 after a year.
- This projection is for illustrative purposes only and does not take into account individual circumstances.
- This projection is based on receiving £10,000 on the day of the account opening which remains invested for 12 months.
